Don't Close Your Office Just For CPR Training: One Hour AHA BLS Training At Your Location

This is not a fly-by-night online CPR class.

This is the nationally-recognized American Heart Association (AHA) Basic Life Support (BLS) training class where students first complete an eLearning component online, then attend a 1-hour session to demonstrate their CPR skills on manikins with a live instructor. This AHA blended BLS course lets people learn at their own pace, at a time most convenient, while preserving the essential hands-on portion of the CPR training.

Best of all, Know CPR will send an instructor to your location so you and your staff can practice and demonstrate CPR skills in the convenience of your own office, in as little as 1 hour.

It's so easy to setup:

- 1) Call Know CPR (703-528-7045) to set up a time for the instructor to come to your location for the skills portion of the training;
- 2) Ensure each person attending the training completes the online portion of the training prior to the scheduled skills session;
- 3) Have each person attend the scheduled 1-hour skills session to practice and demonstrate their CPR skills;

Each person who successfully completes the online and the skills portions will receive an American Heart Association Basic Life Support card, valid for two years.

Pricing: (minimum CPR class size is 2 students)
